

System Blonde
7 Level Ammonia-Free Powder Lightener

System Blonde 7 Level Ammonia-Free Powder Lightener - up to 7 levels of lift. A high performance, ammonia-free powder lightener, perfect for both on or off-scalp lightening techniques. The gentle, yet powerful formula is much kinder to the hair, producing less swelling, porosity and damage, whilst achieving up to 7 levels of lift. Contains Corn Proteins and Cationic Guar to condition and protect the hair during the lifting process. The dust-free formulation mixes to a creamy consistency for easy application and does not dry or flake during the lightening process. System Blonde Powder Lightener's incredible lifting ability means it should be used with much lower volumes of developer - achieve levels of lift with 3% (10vol) and 6% (20vol), that would normally be associated with using 9% (30 vol) and 12% (40vol) with traditional bleaches. For on scalp use, we recommend that only 3%(10vol) is used. DO NOT USE HEAT WITH SYSTEM BLONDE POWDER LIGHTENER.

MIXING Mix 1 PART of System Blonde Powder Lightener with 2 PARTS of your chosen ASP Crème Developer - 3%(10vol) or 6%(20vol) according to lift required. For best results use ASP Crème Developer.

APPLICATION DO NOT wash the hair before lightening. DO NOT USE HEAT.

FULL-HEAD application, take fine sections of hair and apply bleach liberally.
On virgin heads apply to middle lengths and ends first, then to roots where the effect of lightening is quicker because of the scalp's natural heat.

RE-GROWTH applications - do not overlap on to previously lightened hair.
For on scalp application DO NOT COVER.

DEVELOPMENT TIME For very dark hair processing time may take up to 50 minutes. Light bases may require only a short processing time. CHECK FREQUENTLY. REMEMBER: resistant hair will need a longer development time than porous hair. Always check development of System Blonde Powder Lightener during process. DO NOT USE HEAT. When the required lift is achieved rinse thoroughly and gently shampoo the hair.

HIGHLIGHTING DO NOT wash the hair before application. Use desired method of highlighting, i.e. foil, meches, highlighting cap, etc. Apply ASP System Blonde Powder Lightener liberally to the hair. Check development time frequently. DO NOT USE HEAT.

IMPORTANT DO NOT apply to the scalp if there are any abrasions or signs of irritation.
DO NOT mix the product in a confined space and avoid inhaling the powder. If the product gets into the eyes wash immediately with cold water. Always use rubber gloves.

WARNING KEEP OUT OF CHILDREN'S REACH. CAN CAUSE EYE IRRITATION. CONTAINS PERSULPHATE. STORE IN A COOL DRY PLACE.
