

Refresh your bRED colour in an easy, one step application.

b:RED Refresher is a simple and easy to use product designed to refresh red, copper or magenta highlights originally created using Affinage b:RED or a similar product from any other manufacturer. A reapplication of the original highlighting product with its strong lifting action will not fully reproduce the vibrant colour tones of the original. This is because they are being applied to hair which is already been lightened and does not need lightening again - it simply requires a new colour deposit.

b:RED Refresher comes in 5 vibrant shades, Red, Red Violet, Red Copper, Copper and Magenta, matching the colours of Affinage b:RED.

Instructions For Use

- 1 Apply to shampooed/towel dried hair.
- 2 Apply to the previously coloured hair/highlighted areas, with either a bowl and brush or straight from the tube.
- 3 Allow to process, covered, without heat for 5-15 minutes depending on result required.
A longer processing time can produce a darker result.

- 4 Rinse well and Shampoo, with Affinage® ColourCare Shampoo until the water runs clear.
- 5 Condition if necessary with Affinage® ColourCare Conditioner.
