System Blonde Ammonia-Free Crème Lightener

Up to 6 levels of lift.

System Blonde Ammonia-Free Crème Lightener – lightens up to 6 levels, leaving hair in incredible condition. The ultra-gentle formula contains Guar Gum, Rice and Corn Proteins to protect the hair & scalp, nourishing and replenishing moisture. Suitable for all lightening techniques, including on-scalp.

MANIPULATE PACK THOROUGHLY BEFORE USE.

MIXING Mix to a ratio of 1 part Ammonia-Free Crème Lightener to 1 part ASP Crème Developer - 10vol (3%), 20vol (6%), 30vol (9%) or 40vol (12%) depending on lift required. For on-scalp application where a thinner mix is required the mixing ratio is 1 part Ammonia-Free Crème Lightener to 2 parts low strength ASP Crème developer- 10vol (3%) or 20vol (6%) only.

APPLICATION Do not wash the hair before lightening. Take fine sections of hair and apply the product liberally. On virgin hair, apply to mid-lengths first and then to roots (where the lifting action is quicker because of the natural heat from the scalp). On regrowth application, do not overlap to previously lightened hair.

DEVELOPMENT TIME Ammonia-Free Crème Lightener is active for up to 60 minutes - check development frequently. When the desired lift is achieved, rinse thoroughly and gently shampoo the hair. DO NOT USE HEAT. DO NOT COVER.

IMPORTANT Do not apply to the scalp if there are abrasions or signs of irritation. Do not use the product to bleach eyelashes or eyebrows. Do not use the product for any other purpose than bleaching hair. Avoid contact with face and eyes. In case of contact, rinse immediately with cold water. Do not mix the product in metal containers. Always use rubber gloves.

WARNING KEEP OUT OF CHILDREN'S REACH. CAN CAUSE EYE IRRITATION. STORE IN A COOL DRY PLACE. PROFESSIONAL USE ONLY.
