System Blonde
Anti-Yellow Lightening Additive

Mix with any ASP bleach to counteract warm tones during the lifting process, eliminating the need to tone afterwards. Special violet pigments remove any unwanted yellow tones, helping to create clean beautiful blondes.

Recommended for use on medium to lighter bases.

HOW MUCH SHOULD I USE? (per 60g of UNMIXED BLEACH)

BASE

MIXING & APPLICATION Only a small amount of Anti-Yellow Lightening Additive should be mixed with your chosen ASP bleach (too much could result in unwanted tones). Add 1 to 3cm (depending on base) of Lightening Additive per 60g of unmixed ASP bleach. Once added, simply follow your chosen ASP bleach instructions. During processing, regularly check the result - when neutralising unwanted tones during lightening, the lift action becomes more efficient.

ALWAYS PERFORM A SKIN TEST The mixing ratio is 1:500. - 'Hair colorants can cause severe allergic reactions. Read & follow instructions. This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy. Do not colour your hair if: — you have a rash on your face or sensitive, irritated & damaged scalp, — you have ever experienced any reaction after colouring your hair, — you have experienced a reaction to a temporary "black henna" tattoo in the past.'

WARNING Keep out of reach of children. Avoid contact with eyes and face. If in eyes: rinse immediately with water. The product may cause sensitization. Harmful if swallowed. Remove any residual colour immediately from skin or clothes. Do not use the product on eyelashes or eyebrows. Do not use the product if the scalp is irritated. Keep away from heat sources. Always perform a skin test.
