SPECTRUM

The Quick & Easy Solution to Highlighting and Toning.

Spectrum is a quick and easy on or off scalp lightening system that lifts and tones the hair in a single process, allowing you to achieve incredible results in just 2-12 minutes. The ammonia-free formula with unique DATEM PLUS Technology lifts up to 5 levels and can cut through tint whilst being extremely gentle on hair and scalp. Spectrum consists of 3 parts: Lightening Powder, Developer and 6 Toners which can be used to create individual results for every client, with cool, warm or natural tones.

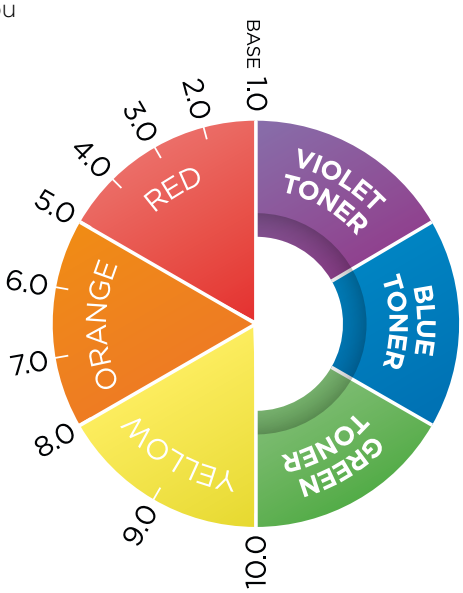
Choosing Toners

Spectrum Toners can subdue or increase warmth in the result:

COOL TONERS

Green, Blue and Violet reduce the warmth in the hair.
For easy selection of cool toners, first identify depth of natural base you are to lift & then refer to the chart below.

NATURAL BASE	DOMINANT TONE IN HAIR	SPECTRUM TONER TO USE
10, 9	YELLOW	VIOLET
8, 7, 6	ORANGE	BLUE
5, 4, 3, 2, 1	RED	GREEN



WARM TONERS

Red, Neutral and Yellow increase warmth in the hair.
Use these toners to give subtle warm results.

Developers

8vol (2.4 %) - up to 4 levels of lift
22vol(6.6 %) - up to 5 levels of lift
30vol (9 %) - maximum 5 levels of lift. For darker bases only. NEVER USE 30vol FOR ON SCALP APPLICATIONS.

Mixing

LIGHTENING POWDER - 2 PARTS/SCOOPS

Spectrum ammonia-free Lightening Powder provides a controlled, gentle lift.

DEVELOPER - 2 PARTS/SCOOPS

There are 3 strengths of Spectrum Developer - 8vol (2.4%) for up to 4 levels of lift. 22vol (6.6%) for up to 5 levels of lift. 30vol (9%) for the maximum 5 levels of lift. For darker bases only.
NEVER USE 30vol FOR ON-SCALP APPLICATIONS.

TONER - 1 PART/SCOOP

Up to 2 scoops may be used for maximum tone deposit.
There are 6 Spectrum Toners. For help with identifying opposing tones, you can use the colour star on the Spectrum Quick Start Guide.

REMEMBER The warm Toners will create subtle tones of blonde. Not bright red, orange or yellow results as their pre-mixed appearance might suggest.

Application

The unique consistency of Spectrum makes using your chosen method of application (on scalp, meche, foils, cap, spatula, etc.) very easy. Apply mixed Spectrum evenly to each section ensuring enough product is used to penetrate the hair.

Processing - Highlighting

REMEMBER Spectrum does not expand when developed under medium heat. This makes it safer and more versatile, meaning all techniques are possible. Pre-heat dryer/climazone before developing.
Always cover Spectrum with a plastic cap unless using foil or meche.

Process for between 2 and 12 minutes (max) under medium heat (40 - 42°C / 104 - 108°F).
Check the lift (lightening effect) every 2 - 3 minutes.

The Spectrum Cap

An ideal way to achieve quick and easy highlighting effects is to use the Spectrum highlighting cap.
Simply place the cap on the head, tie around neck and under chin. Warm the cap with a hair dryer to shrink and mould to head shape. Using a highlighting hook pierce the cap and pull through strands of hair to desired thickness. Warm the cap a second time to seal the holes. Apply mixed Spectrum and process as per instructions.

On Scalp Application

IMPORTANT DO NOT apply to the scalp if there are any abrasions or signs of irritation.
DO NOT USE HEAT.

- DO NOT COVER.
- Do not use 30vol Developer.
- Process for up to 12 minutes. Check the lift (lightening effect) frequently during processing.
- Always use protective gloves.

If the desired result is not achieved after the maximum processing time (12 minutes), rinse from the hair and re-apply (on dry hair).

Removal

Rinse thoroughly, shampoo and condition with Affinage MODE ColourCare Shampoo and Conditioner.

COOL TONERS

GREEN TONER
- Subdues red undertones.
- For darker to medium bases.
- Use if previous colour contains warmer tones.

MINT Frgrance

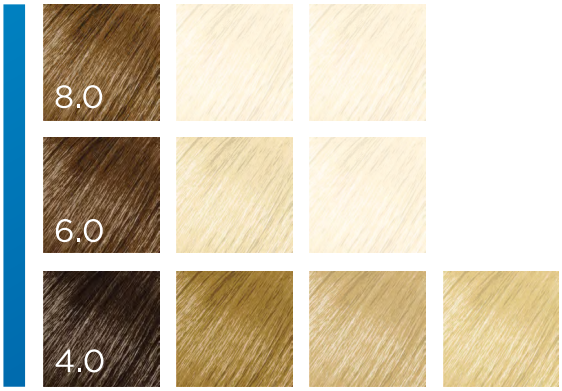
BLUE TONER
- Subdues orange undertones.
- For darker to medium bases.
- Use if previous colour contains warmer tones.
- Creates controlled & neutral results.
- Adds coolness to a warm tone.

BLUEBERRY Fragrance

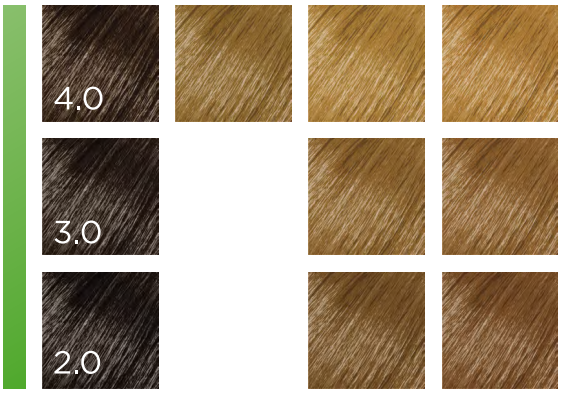
VIOLET TONER
- Controls gold or yellow undertones.
- For medium to lighter bases (ideally 7 & lighter).
- Use if a clear, cool blonde is desired.
- Adds coolness to a warm tone.

VIOLETS Fragrance

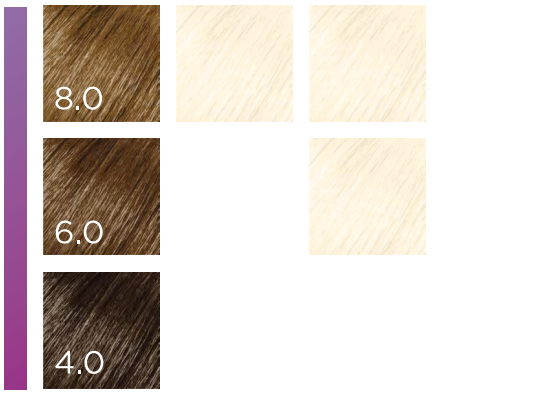
BLUE



GREEN



VIOLET



WARM TONERS

NEUTRAL TONER
- Enhances natural tones.
- Creates light, caramel tones.
- Works well on all bases when a natural, sun-kissed result is desired.

CARAMEL Fragrance

YELLOW TONER
- Enhances golden tones.
- Creates delicate, golden tones.
- Suitable for all bases.

LEMON Fragrance

RED TONER
- Enhances warm tones with a delicate strawberry blonde.
- Suitable for all bases.

BESPOKE LIFTING & TONING IN ONE EASY STEP

Spectrum is a quick and easy on or off scalp lightening system that lifts and tones the hair in a single process, allowing you to achieve incredible results in just 2-12 minutes. The ammonia-free formula with unique DATEM PLUS Technology lifts up to 5 levels and can cut through tint whilst being extremely gentle on hair and scalp.

QUICKSTART GUIDE

MIXING

2	+	2	+	1*
		8 VOL 2.4% | 22 VOL 6.6% | 30 VOL 9%		
LIGHTENER		DEVELOPER		TONER

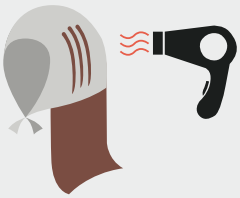
* Up to 2 PARTS/SCOOPS may be used for maximum tone deposit.

APPLICATION

OFF-SCALP

Use your chosen method of application (meches, foil, spatula, etc.)

SPECTRUM CAP



Warm the cap with a hair dryer to shrink and mould to head shape.

Apply Spectrum mix to highlights.

ON-SCALP

For on-scalp application please read full instructions.

PROCESSING

2-12min

2-3min

REMOVAL

COLOURCARE

Process for between 2 and 12 minutes (max) under medium heat.
Check the lift (lightening effect) every 2 - 3 minutes.

Spectrum will continue to work after 12 minutes but the protection of DATEM+ will decrease, & it will become more like a traditional bleach.
